

LOI offers a wide range of services designed to fit each client's specific needs from conceptual design to final commissioning and startup. Presently LOI has recognized a need within the "Turbine Energy Market", to provide oversight for Customers that have the need to design/build new or the modification of existing "Turbine Powered Facilities"

- Define Project Requirements
- Engineering Design Supervision
- Equipment Selection
- Packaging Supervision
- Facility Installation and Commissioning
- After Market Services
- Turbine and Package Upgrades and modifications
- Maintenance Management Services
- Depot Repair Management/Inspection Services

LOI's proven Project Managements expertise and experience of 500 years brings the ability to provide a "Finished Project" that has been conceptually planned and designed, to conform within the parameters of the Customer, on time and within budget.
